AI-POWERED CRYPTO ARBITRAGE & CROSS-CHAIN EXECUTION

Turning market complexity into consistent,
automated returns without manual trading.

Automated Intelligence | Cross-Chain Execution | 24/7 AI Monitoring

A0EC80

EXECUTIVE OVERVIEW

Arbridge Network is an automated crypto trading platform built on a singular conviction: that the greatest opportunities in blockchain markets are found not in speculation, but in the structure of the market itself. Price inefficiencies, liquidity imbalances, and cross-chain discrepancies exist every second across dozens of blockchain ecosystems. These are predictable, recurring patterns extraordinarily difficult to capture manually. We built Arbridge to capture them automatically, at speed, and with the precision of institutional-grade infrastructure.

Web3 arbitrage is inaccessible

THE CORE PROBLEM

What needs to change? Why?

ADVANCED INFRASTRUCTURE REQUIRED

Capturing arbitrage opportunities demands institutional-grade systems that most users simply don't have access to.

CONSTANT MARKET MONITORING

Price discrepancies appear and vanish in milliseconds, requiring round-the-clock surveillance across dozens of chains.

CROSS-CHAIN COMPLEXITY

Executing trades across multiple blockchains simultaneously requires fragmented tools, deep technical knowledge, and high speed.

OUR SOLUTION

A unified cross-chain automation platform that covers every layer

Simple flow. Full ctrl. Measurable results

HOW IT WORKS

CREATE YOUR ACCOUNT

01

Sign up and access the Arbridge platform. No trading experience required. Your journey begins immediately.

FUND YOUR WALLET

02

Top up with USDT, BTC, or other supported crypto-currencies to power your automated cross-chain arbitrage execution.

SELECT SMART ADVISOR

03

Choose between available arbitrage modes based on your capital size, risk preference, and target return.

PULSE GOES LIVE

04

Pulse activates and begins scanning markets 24/7, detecting and executing opportunities automatically.

MONITOR EXECUTION

05

Track real-time performance, trading activity and health metrics directly through the analytics dashboard.

WITHDRAW / ADJUST

06

Manage your returns and positions through the platform smart withdrawal system with full audit trails.

WITHDRAWAL LOCKUP POLICY

Transparency is not optional at Arbridge Network, it's the foundation of our system integrity.

SEED CAPITAL LOCK

Seed capital (money put into the Bot) = \$1,000. User withdraws after 90 days.

EARLY WITHDRAWAL PENALTY

Withdrawals made before the 90-day period will incur a 30% penalty on the seed capital. This measure is designed to safeguard the stability of the system and protect all participants.

Penalty calculation: $\$1,000 \times 30\% = \300

Remaining balance after penalty: $\$1,000 - \$300 = \$700$

WITHDRAWAL FEE

All withdrawals are subject to a 5% processing fee, which covers administrative and network costs.

MINIMUM WITHDRAWAL AMOUNT

The minimum amount that can be withdrawn is \$20.

EXAMPLE CALCULATION

Balance after penalty: \$850

Processing fee (5%): $\$850 \times 5\% = \42.50

Net amount received: $\$850 - \$42.50 = \$807.50$

COMMITMENT TO TRANSPARENCY

At Arbridge Network, transparency is fundamental to maintaining trust and ensuring the integrity of our system.

THE PULSE ENGINE

Just as the heart never ceases to beat, Pulse operates continuously without stopping. Pulse thinks, adapts and executes with the sophistication of an institutional trading desk, but with the speed only machine intelligence can achieve.

ARBITRAGE MODE

Detects price discrepancies across exchanges and executes buy-low / sell-high sequences. Up to 1.6% daily target.

CROSS-CHAIN MODE

Uses bridge infrastructure to move capital across Ethereum, Arbitrum, Polygon and more for maximum yield.

Core Capabilities

01

Real-Time Market Surveillance across dozens of chains simultaneously

02

Probabilistic Validation: Only statistically favourable trades execute

03

Automated Execution with millisecond-level speed and precision

04

Adaptive Learning: strategies evolve as blockchain markets mature

PULSE SMART ASSISTANTS

Pulse Smart assistants are built to think, validate and act faster than any normal Bot ever could, they serve as your always- on smart advisor across every blockchain market. It scans and executes only when the conditions are in your favour so you don't have to watch the markets or second-guess your decisions.

Pulse Bouquet		Daily Return	Allocation Range	Dur.
01 PULSE FOUNDATION Begin your investment journey with a managed portfolio designed for those new to trading. Low entry, real exposure.	0.8% LOW RISK	\$100.00 - \$999.00	90 DAYS	
02 PULSE GRID Step up your strategy with greater capital allocation and access to more dynamic trading opportunities.	1.2% MODERATE	\$1000.00 - \$50,000.00	90 DAYS	
03 PULSE PRIME Designed for serious investors who understand the value of deploying capital at scale. Maximum exposure, institutional-grade execution.	1.6% ADVANCE	\$50,000.00 - \$1,000,000.00	90 DAYS	

SUBSCRIPTION AND ENTRY

A subscription to the Arbridge Network provides full access to its integrated Ecosystem. Once activated, users gain unlimited entry to the Pulse smart assistants. This is a 90 days special membership module, this offer is only valid for 90 days during our prelaunch phase after official launch, this membership structure will be changed.

CORE LICENSE

Built for streamlined entry into the Arbridge platform

Billed Quarterly

\$66

PROFESSIONAL LICENSE

Provides expanded access to Pulse's full cross-chain swap capabilities & all market coverage across multiple blockchain ecosystems.

Billed Quarterly

\$199

INSTITUTIONAL LICENSE

Designed for traders who want the complete. Provides unlimited access to all Pulse smart assistants and advisors.

Billed Quarterly

\$499

A Step-by-Step Breakdown

OPERATIONAL FRAMEWORK OF THE ARBRIDGE NETWORK

ACCOUNT REGISTRATION

01

Begin by completing the onboarding process through a secure sign-up. This establishes your unique user profile within the Arbridge Network and grants you access to the platform's infrastructure.

ACCESS THE OPERATIONS HUB

02

Once registered, log in to the Operations Hub, your centralized dashboard. This is where you manage your account, track activity, and interact with all core features of the ecosystem.

CAPITAL ALLOCATION

03

Fund your account using the supported digital assets. This step enables your account to participate in market execution and prepares your capital for deployment across the system's strategies.

A Step-by-Step Breakdown

OPERATIONAL FRAMEWORK OF THE ARBRIDGE NETWORK

SUBSCRIBE TO THE PULSE ECOSYSTEM

04

The platform operates on a subscription-based model. Access to our suite of AI-driven “smart assistants” - Pulse Foundation, Pulse Grid & Pulse Prime, which is unlocked via licensing. Subscribing grants you a license to more of these assistants. Once activated, you gain full access to the platform’s infrastructure.

ACTIVATE EXECUTION

05

Upon subscription, your selected license is activated, and is seamlessly linked to your trading account. This gives you access to our smart assistants, enabling automated market execution and allowing the smart assistants to operate continuously throughout the duration of your subscription.

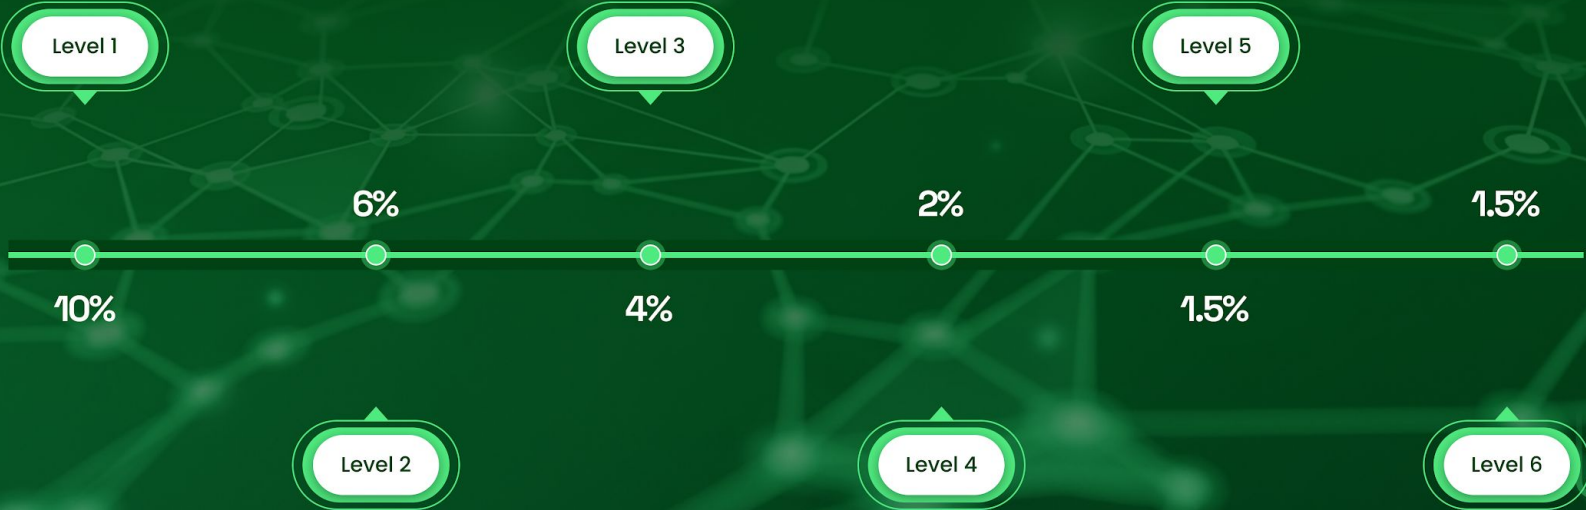

PERFORMANCE MONITORING & SYSTEM ENGAGEMENT

06

With your active license, you can monitor performance in real time through the Operations Hub. The platform provides full visibility into trade activity, system behavior, and results ensuring transparency while allowing you to experience the efficiency and consistency of the Pulse ecosystem firsthand.

AFFILIATE TIER STRUCTURE

Our Affiliate Tier Structure is designed to reward every level of participation from your very first referral to building a thriving network of active traders. The more you grow your network and the more your referred members trade, the higher your tier climbs and the greater your commissions become, creating a compounding income stream that scales alongside the platform itself.

TIER 2 - ELITE PARTNER

RANK-GATED ADVANCEMENT FRAMEWORK/ PERFORMANCE & LEADERSHIP UNLOCK SYSTEM

Progression within the Arbridge network is governed by a structured Rank-Gated Advancement Model, where each tier unlocks based on a combination of Qualified Volume (QV) and organizational development metrics. This ensures partners are rewarded not only for personal production, but also for building scalable, high-performing network structures.

TIER 1 - ENTRY TIER (IMMEDIATE ACTIVATION)

All partners begin at Entry Tier upon onboarding.

- Earnings: 10% on direct volume
- Requirements: None

TIER 2 - PERFORMANCE TIER

Unlocks upon achieving initial production milestones.

- Requirement: Tier 1 QV \geq \$5,000
- Structure Requirement: \geq 1 Active Leg
- Earnings: 6% on Tier 2 volume

TIER 3 - BUILDER TIER

Focused on early-stage network expansion and duplication.

- Requirement: Tier 2 QV \geq \$35,000
- Structure Requirement: \geq 2 Active Legs
- Earnings: 3% on Tier 3 volume

TIER 4 - EXPANSION TIER

Represents broader network scaling and structural depth.

- Requirement: Tier 3 QV \geq \$85,000
- Structure Requirement: \geq 2 Active Legs & Earnings: 6% on Tier 4 volume

TIER 5 - LEADERSHIP TIER

Designed for partners developing emerging leaders within their organization.

- Requirement: Tier 4 QV \geq \$150,000
- Structure Requirement: \geq 2 Team Leaders (each qualified at Tier 3)
- Earnings: 1.5% on Tier 5 volume

TIER 6 - EXECUTIVE TIER

Reflects advanced leadership with multi-level organizational influence.

- Requirement: Tier 5 QV \geq \$350,000
- Structure Requirement: \geq 3 Active Legs qualified at Tier 4
- Earnings: 1.5% on Tier 6 volume

MILESTONE ACHIEVEMENT STRUCTURE

Profit from Price Discrepancies

ARBITRAGE MARKET EXECUTION

Identical assets often trade at different prices across exchanges and liquidity pools. Pulse identifies these spreads and executes buy-low, sell-high automatically. Arbitrage takes advantage of price diffs for the same asset across different markets. When it detects a viable price spread, it confirms liquidity, simulates outcomes, accounts for fees, and executes trades at speed.

Detects viable spreads
across on-chain markets

Executes buy-sell sequences
with institutional speed

Removes emotional trading
and timing errors

Operates continuously
across global markets
24/7

Access Liquidity Anywhere

CROSS-CHAIN SWAPS

Blockchain fragmentation creates pricing inefficiencies. The best rates for your assets might exist on Ethereum, Arbitrum, Polygon, Solana, BNB Chain, or a dozen other chains. Pulse finds them and moves your capital there.

SEAMLESS MULTI-CHAIN EXECUTION

Capital flows seamlessly to where opportunities exist. No single-chain limitations or missed opportunities.

SECURE BRIDGE INFRASTRUCTURE

Cross-chain transfers use battle-tested, audited bridge protocols for safe and reliable capital movement.

CAPITAL WHERE IT MATTERS

Capital is always deployed where conditions are most favorable – automatically, without manual intervention.

UNIFIED CROSS-CHAIN STRATEGY

A unified strategy executes intelligently across fragmented markets, treating all chains as one opportunity space.

TRADING INFRASTRUCTURE

Core Technology Strengths

LOW-LATENCY EXECUTION

Milliseconds matter in arbitrage. Our infrastructure executes faster than manual trading could ever achieve, capturing spreads before they disappear.

AI-DRIVEN PROBABILISTIC MODELING

Every opportunity is validated through advanced probabilistic modeling before execution. Only statistically favorable trades move forward.

CROSS-CHAIN BRIDGE INFRASTRUCTURE

Secure, audited bridge protocols enable safe and reliable capital movement across multiple blockchain ecosystems simultaneously.

SCALPING MICROSTRUCTURE

Engineered for minimal slippage and maximum precision, our microstructure captures micro-returns at scale across high-frequency opportunities.

REAL-TIME TELEMETRY HUB

Anonymized performance data streams through our platform dashboard, giving users transparent visibility into system activity and results.

BUILT FOR EVERY TRADER

Whether you're new to crypto or a seasoned investor, Arbridge levels the playing field.

FOR BEGINNERS

No technical expertise required. Arbridge handles the complexity while you benefit from strategies typically reserved for professional traders and quant funds.

FOR EXPERIENCED TRADERS

Multiply your effectiveness without multiplying your workload. Pulse executes more opportunities, faster, than any manual approach ever could.

FOR PORTFOLIO DIVERSIFIERS

Add a non-correlated income stream powered by market structure rather than directional bets. A new layer of returns driven by real market dynamics.

TRANSPARENCY & REPORTING

Arbridge Network gives users full, clear visibility into everything the platform does. Every trade, execution session, and system update is visible so users can verify performance, review history, and export data for independent analysis.

Access Liquidity Anywhere

LIVE EXECUTION SESSIONS

See trades as they happen in real time – full execution logs with timestamps, asset pairs, and outcomes.

PULSE VERSION & UPTIME DATA

Track which Pulse version is running and system uptime. Know exactly when and how the system operates.

HISTORICAL SESSION SUMMARIES

Review past performance at a glance through session snapshots and historical reporting dashboards.

EXPORTABLE LOGS

Download CSVs and data reports for independent analysis, accounting, or personal record-keeping.

SECURITY & SAFETY

Security is a foundational design principle, not an afterthought

SECURE BRIDGE INFRASTRUCTURE

01

Cross-chain transfers use battle-tested, audited bridge protocols specifically designed for safe and reliable asset movement across ecosystems.

REAL-TIME SYSTEM MONITORING

02

Continuous oversight of all system activity for anomaly detection. Our team monitors health 24/7 and intervenes where necessary.

EXECUTION FAILSAFES

03

Pulse is engineered with internal failsafes that handle execution errors, network congestion, and unexpected market conditions automatically.

DATA PRIVACY & ENCRYPTION

04

All user data is encrypted, access is tightly controlled. Arbridge operates in compliance with industry-standard data privacy and security practices.

PROBABILISTIC TRADE FILTERING

05

No trade executes unless it passes Pulse's statistical validation layer – minimizing unprofitable execution and protecting capital at every step.

ARCHITECTURE-LEVEL PROTECTION

06

User capital protection is the first design constraint across every layer of the platform – from smart contract logic to interface security.

RISK PHILOSOPHY

Automation is powerful when intelligently governed

PROBABILISTIC VALIDATION

Every trade must clear defined statistical thresholds before Pulse acts. Quality of execution over quantity of activity.

DEFINED EXECUTION PARAMETERS

Pulse operates within carefully defined parameters for each strategy type, limiting exposure to unexpected market conditions.

EMOTION-FREE DECISION MAKING

Pulse executes based exclusively on data and models never sentiment, news cycles, market fear, or human hesitation.

CONTINUOUS SYSTEM HEALTH CHECKS

Systems are assessed before each session to ensure all components are operating within expected parameters.

VOLATILITY-AWARE EXECUTION

The system adapts to market volatility. During extreme conditions, execution logic adjusts to preserve capital and reduce exposure.

OUR STORY

From Insight to Infrastructure

Arbridge Network was founded by a team of engineers, quantitative analysts, and blockchain developers who shared a frustration: The most reliable sources of return in crypto markets, systematic arbitrage and cross-chain inefficiencies required a level of automation and infrastructure that simply did not exist in a form accessible to everyday participants. The founding team spent years observing how institutional players were extracting returns from market structure while retail participants chased price predictions. The asymmetry was stark. The infrastructure gap was real. Development of our core execution engine, Pulse, began with a clear mandate: build a system that combines the speed of algorithmic trading, the intelligence of AI-driven validation, and the reach of cross-chain infrastructure wrapped in a platform accessible to users without a quantitative finance background.

“We did not set out to build another trading platform. We set out to solve a problem that manual trading simply cannot solve.”

BUILT ON PROVEN INFRASTRUCTURE

Our core technology has been developed with institutional-grade precision and tested across live blockchain environments with serious technical depth and rigorous execution standards.

WHAT WE STAND FOR

Our Core Values — Non-Negotiable Principles

PRECISION OVER VOLUME

We do not execute for the sake of activity. Every trade Pulse makes is validated. We'd rather execute fewer high-quality trades than flood markets with marginal positions.

TRANSPARENCY WITHOUT EXCEPTION

Users deserve to understand what is happening with their capital. Our platform provides real-time performance tracking, clear fee structures, and honest communication — always.

SECURITY AS A FOUNDATION

We treat the protection of user capital as the first design constraint, not an afterthought. Our platform's architecture and secure bridge infrastructure are structural, not optional.

ACCESS FOR ALL

The strategies Arbridge executes were previously available only to institutional players with deep resources. We believe every investor deserves access to market-structure returns.

WHAT WE STAND FOR

Our Core Values — Non-Negotiable Principles

24/7

Continuous Operation

500+

Tokens Supported

0

Manual Trading Required

HOW PROFITS ARE GENERATED

Pulse executes trades continuously whenever statistically favorable opportunities arise. During high-volatility periods, inefficiencies tend to be more abundant. The system is designed to be active and adaptive regardless of broader market direction.

WHAT DRIVES RETURN FREQUENCY

The frequency of profitable activity is tied to market conditions across blockchain ecosystems. Pulse scans for price spreads and cross-chain discrepancies continuously, acting only when conditions meet its strict validation criteria.

TRANSPARENT FEE STRUCTURE

Arbridge operates on a fully transparent fee structure. Details on platform fees, performance fees, and applicable gas or network costs are clearly outlined during onboarding and within your dashboard. No hidden charges, ever.

Q: DO I NEED TRADING EXPERIENCE?

A: Not at all. Arbridge is designed to remove technical barriers. The platform handles everything from opportunity detection to trade execution – no charts, no monitoring required.

Q: IS TRADING FULLY AUTOMATED?

A: Yes. Pulse handles all market scanning, opportunity validation, capital routing, trade execution, and cross-chain transfers. No manual trading or constant monitoring needed.

Q: HOW DOES PULSE IDENTIFY OPPORTUNITIES?

A: Pulse monitors dozens of blockchain markets in real time, scanning for price discrepancies. Each opportunity is run through a probabilistic modeling engine – only statistically viable trades execute.

Q: WHAT HAPPENS IF A TRADE FAILS?

A: Pulse includes internal failsafes for execution errors, network congestion, and unexpected conditions. If a trade cannot complete favorably, the system halts or reverses to protect capital.

EDUCATION & SUPPORT

ARBRIDGE EDUCATIONAL HUB

Arbridge Educational Hub provides resources, onboarding guides, and ongoing updates to keep every member informed and empowered.

Early Adoption Window – Strategic Entry Before Full Deployment

PRE-LAUNCH PHASE

We are now entering the pre-launch phase, where the focus is on onboarding early adopters, strengthening the ecosystem, and preparing the platform for full market deployment. This phase allows us to position strategic partners and leaders early, before broader market expansion begins.

Phase 01

EARLY ADOPTER ONBOARDING

Strategic early partners and users gain access to the platform before full public deployment. Priority positioning and ecosystem entry.

Phase 02

ECOSYSTEM STRENGTHENING

Growing liquidity, user activity, and network participation – each new participant feeds directly into system performance.

Phase 03

FULL MARKET DEPLOYMENT

Our system opens full market access. The ecosystem's intelligence and performance compound with scale.

ROADMAP

Q2

SCALE & OPTIMIZE

- Deeper AI analytics
- Enterprise tools & APIs
- Expanded Smart pulse catalog
- Verified partner access

Q3

CROSSCHAIN EXPANSION

- Multi-chain swaps live
- Additional blockchain support
- Strategy optimization
- Mobile monitoring access

Q4

ECOSYSTEM GROWTH

- Live staking pools
- Community governance
- Global market expansion
- Institutional integrations

EXECUTIVE CHAIRMAN **JOHN BEAUMONT**

Meet the Executive Chairman. John Beaumont is a Board-level executive, chairman, and strategic advisor with more than 30 years of international experience leading high-growth, technology-driven organisations across telecoms, the Internet, FinTech, and professional services. He has built a strong reputation for combining commercial vision with operational discipline, bringing deep expertise in go-to-market strategy, sales transformation, corporate governance, and the scaling of B2B technology ventures. At Arbridge Network, John leads with a clear focus on innovation, strategic growth, and building a trusted platform designed for long-term value creation.

Throughout his career, John has held Chair, NED, and CEO roles, including leadership positions in FTSE100, NASDAQ, and LSE-listed businesses. His track record includes helping lead a \$1 billion dual flotation on the LSE and NASDAQ, scaling an Internet business from £4 million to £150 million in revenue within four years, delivering successful business turnarounds, and contributing to the growth of major financial and technology platforms. This blend of boardroom leadership, international experience, and hands-on strategic execution provides the foundation for his role in guiding Arbridge Network's development as a successful, modern, technology-led business.

COMPLIANCE & DISCLAIMERS

PLATFORM NATURE

- ★ Arbridge Network provides licensed access to automated trading software, AI execution infrastructure, and educational materials related to crypto arbitrage and cross-chain strategies.
-

PERFORMANCE DISCLAIMER

- ★ Returns from arbitrage and cross-chain strategies are driven by market conditions, specifically the frequency and size of price inefficiencies available at any given time. Arbridge does not guarantee specific return figures, as market dynamics fluctuate.
-

RISK ACKNOWLEDGMENT

- ★ All automated trading tools carry inherent risk. No system – including Pulse – can guarantee zero losses on every trade. Subscribers should engage responsibly and only allocate capital they are prepared to risk.
-

DATA & PRIVACY

- ★ Arbridge Network operates in compliance with industry-standard data privacy and security practices. All user data is encrypted, access is tightly controlled, and we do not sell or share personal information with third parties.

START TRADING SMARTER TODAY

Arbridge Network transforms market inefficiencies into consistent returns through automation that never sleeps, never hesitates, and never misses an opportunity.
