

User Onboarding Guide

A Step-by-Step Walkthrough to Getting Started on the Platform

Pre-Launch Phase · For New Users · Confidential

Welcome to Arbridge Network. This guide is designed to walk you through each step of the onboarding process clearly and simply, so that you can set up your account, secure your profile, fund your wallet, and begin trading with confidence.

There are six steps in total. Each one builds on the last. Follow them in sequence and you will have a fully active, secured, and funded account ready to access the PULSE trading system.

Log In to Your Operations Hub

Your Operations Hub is your personal command centre on the Arbridge Network platform. It is where you manage your account, monitor your portfolio, access PULSE, and control all platform activity. Getting in is straightforward.

HOW TO LOG IN

- Open the Arbridge Network platform and navigate to the login page.
- Enter the **email address** you registered with.
- Enter your **account password** in the password field.
- Complete the **CAPTCHA verification** — this is a simple security check that confirms you are a real person accessing the account. Follow the on-screen instructions to complete it (e.g. selecting images or checking a box).
- Click **Log In** to access your Operations Hub.

TIP Make sure you are accessing the platform through the official Arbridge Network link. Never log in through a link sent via an unsolicited message or email.

Complete Your KYC Verification

KYC stands for **Know Your Customer**. It is a standard regulatory requirement used across financial and digital asset platforms worldwide to verify the identity of users and protect the integrity of the platform. Completing your KYC is mandatory before you can access full platform functionality.

You will need to submit one of the following government-issued identity documents:

ACCEPTED DOCUMENTS

- National Identity Card
- Driver's Licence
- International Passport

HOW TO SUBMIT

- Navigate to the **KYC Verification** section within your Operations Hub.
- Select the document type you are submitting.
- Upload a clear, legible photograph or scan of your chosen document. Ensure all four corners of the document are visible and that the text is readable.
- Submit for review.

TIP KYC verification is typically completed within 24 hours of submission. You will receive a notification once your identity has been confirmed. Ensure your document is valid, unexpired, and that the upload is high quality to avoid delays.

Note: KYC verification is a regulatory compliance requirement. Your documents are processed securely and used solely for identity verification purposes in accordance with applicable data protection standards.

Activate Two-Factor Authentication (2FA)

Two-Factor Authentication — commonly known as 2FA — adds a critical second layer of security to your account. Once activated, any withdrawal request will require you to provide a time-sensitive authentication code in addition to your password. This ensures that even if your password is ever compromised, your funds remain protected.

2FA is required to process withdrawals on the Arbridge Network platform. Setting it up is quick and strongly recommended as part of your initial account setup.

WHAT YOU WILL NEED

- A smartphone or tablet with an Authenticator app installed. Recommended apps include **Google Authenticator** or **Authy**, both available free on iOS and Android.

HOW TO ACTIVATE

- Navigate to the **Security Settings** section of your Operations Hub.
- Select **Enable Two-Factor Authentication**.
- A unique **QR code** will appear on your screen.
- Open your Authenticator app on your smartphone or tablet and use the **Scan QR Code** function to scan the code displayed on your screen.
- Your Authenticator app will generate a **6-digit authentication code**. Enter this code into the verification field on the platform.
- Click **Confirm** to complete activation. Your 2FA is now live.

TIP Store your Authenticator app backup codes in a safe place. If you lose access to your phone, these codes allow you to recover your account. Never share your authentication codes with anyone.

Fund Your Account

With your identity verified and your account secured, you are now ready to deposit funds into your Arbridge Network wallet. The platform supports multiple cryptocurrencies, giving you flexibility in how you fund your account.

SUPPORTED DEPOSIT CURRENCIES

- Bitcoin (BTC)
- Ethereum (ETH)
- USDT (Tether)

-
- Other supported cryptocurrencies listed within your Operations Hub

HOW TO DEPOSIT

- Navigate to the **Wallet** or **Fund Account** section of your Operations Hub.
- Select the cryptocurrency you wish to deposit.
- Your unique **deposit wallet address** will be displayed. This is the address you will send funds to.
- From your external wallet or exchange, send funds to this address.
- Once your transaction receives the required blockchain confirmations, your balance will **update automatically and instantly** in your Operations Hub. No manual processing. No delays.

TIP Always double-check the wallet address before sending funds. Cryptocurrency transactions are irreversible. Copy the address directly from your Operations Hub rather than typing it manually.

Upgrade to a Paid Membership — Select Your License

To unlock the full capabilities of the Arbridge Network platform and begin trading through the PULSE system, you will need to upgrade to a paid membership by selecting a license that suits your participation level.

There are three license tiers available, each granting access to one or more PULSE membership plans and a corresponding range of platform features:

<p>CORE</p> <p>\$66</p> <p>Entry-level access to PULSE and core trading features</p>	<p>PROFESSIONAL</p> <p>\$199</p> <p>Advanced strategies and expanded platform capabilities</p>	<p>INSTITUTIONAL</p> <p>\$499</p> <p>Full platform access with premium PULSE memberships</p>
--	--	--

HOW TO UPGRADE

- From your Operations Hub, click on **PULSE Subscription**.
- A subscription panel will appear. Click **New Subscription**.
- Review the three available license options and select the one that best aligns with your goals and intended level of participation.
- Proceed to payment and confirm your license purchase.

TIP If you are new to the platform, the Core License is a practical starting point. You can upgrade to a higher tier at any time as your familiarity with the platform grows.

Purchase a Membership and Begin Trading

You are now ready to activate PULSE and begin trading. This final step takes you through creating your portfolio, entering your trading amount, choosing your compounding preference, and going live.

HOW TO ACTIVATE PULSE AND START TRADING

- From your Operations Hub, navigate to **Portfolio**.
- Click **New Portfolio** and select the license you purchased in Step 5.
- Enter the **amount** you wish to allocate to this portfolio.

COMPOUNDING OPTION

- You will see a **Compounding** toggle. Here is what each option means:

Compounding ON — Your profits are automatically reinvested into your portfolio on a weekly basis, allowing your trading base to grow over time through the power of compound returns.

Compounding OFF — Your profits accumulate without being reinvested. You retain full control to withdraw them at any time on a daily basis.

- Once you have entered your amount and selected your compounding preference, click **Preview** to review your portfolio setup.

- Review the details carefully, then click **Confirm** to activate your portfolio and go live.

TIP Once your portfolio is active, PULSE begins executing automatically on your behalf. You can withdraw your profits daily or allow them to compound weekly. Both options are available at any time from within your Operations Hub.

Note: Trading performance is driven by live market conditions. While the PULSE system is designed to identify and execute on structural market opportunities, all trading activity involves risk. Past performance is not indicative of future results.

Quick Reference — All Six Steps

STEP	ACTION	WHAT TO EXPECT
01	Log In	Enter email, password, complete CAPTCHA
02	KYC Verification	Upload valid ID — verified within 24 hours
03	Enable 2FA	Scan QR code with Authenticator app — required for withdrawals
04	Fund Account	Send crypto to your wallet address — reflects instantly
05	Select License	Choose Core (\$66), Professional (\$199), or Institutional (\$499)
06	Activate PULSE	Create portfolio, set amount, choose compounding, confirm

You are now fully set up on the Arbridge Network platform. PULSE is active, your account is secured, and you have full access to the tools and infrastructure designed to work on your behalf — automatically, precisely, and continuously.

If you encounter any questions or require assistance at any stage of the onboarding process, contact the Arbridge Network support team through the official support channel available within your Operations Hub.
